Enhanced Extraterrestrial Spacecraft Activity around Earth

as reported by an alien intelligence

By Mark Bennett

On October 18th 1973, an alien intelligence known as The Master Aetherius gave a message to the people of Earth through the mediumship of Dr. George King (1919-1997), in which he reveals why there is more spacecraft activity around Earth possibly than ever before.

In this article, we have reproduced certain extracts (in inverted commas, bold and italic) of this communication, with an introduction and explanations where necessary by Mark Bennett – an International Director of The Aetherius Society.

Recent decades have seen tremendous changes on this planet. Some of these are obvious – technology, politics, culture, fashion, the arts, science, education, economics, ideology etc are almost unrecognizable in certain parts of the world today to what they were in the middle of the last century.

Other changes on Earth, and in the rest of the Solar System, are less obvious, and less well known, but much more significant. One of the most important is the Initiation of Earth, which took place on July 8th, 1964.

The Earth is a living entity – in the most literal possible sense. She is an intelligence just like you or me – but vastly more evolved. She thinks, she feels pain, she meditates. She is currently sacrificing her own evolution so that we can live here.

In 1964 she was given an initiation by advanced beings from elsewhere in the Solar System. In this initiation she received special energies from the Sun. She is not yet using these energies to the full extent that she could. If she did, we would not be able to live here – because these energies are too powerful.

The Master Aetherius:

“Gradually, instruments on far distant, inhabited worlds relayed information to their controllers regarding these prominent changes and the foreseen reaction took place, namely, probes of exploration were dispatched from many parts of this Galactic System in which we exist... Naturally, such stupendous activity has attracted the interest of many different races and cultures on worlds, some of which are hundreds of thousands of light years from this Solar System, and gradually they are coming to

explore and – for the most part – learn lessons from this exploration.

Traffic lanes through the Solar System have been opened to any who wish to come in peace. Therefore, many different cultures are now coming and will continue to come throughout the years. Some of these visitors are visiting other Planets in the Solar System, and some are visiting Terra as well.

“Terra” is the word used by The Master Aetherius for “Earth”.

“...Not all of them have humanoid bodies, but for the most part, they would cover their bodies with a humanoid-type of construction; especially if they were liable to be seen by the inhabitants of Terra...”

This means that if a person on Earth does actually see one of these alien visitors, they may not be seeing them in their natural form. However, we are not categorically told that it is impossible for an Earth person to see an alien being in a non-humanoid form – which is a fascinating thought to say the least!

“...Some come from the constellations which you call Virgo, Sagittarius and other constellations within that area of Space; others from outside of these constellations and some from even outside of this Galaxy. It is by such exploration as this that many cultures learn to progress - and they are progressing slowly in this way.

“Being from different cultures, the visitors are also on different levels of evolution – some of which could be termed as quite alien to our concepts. Nevertheless, they are sentient beings...”

“...The central traffic control agency, which has in the past been referred to

as, ‘Mars Sector 8’, is still in control, in that, examination of the visitors is carried out before entry is allowed. I may say that some have already been advised not to come deeper into the atmosphere of Terra, because of danger factors which – unknown to them – they carried with them. Up to now, this advice has been taken by the tourists...”

This is a very important point.

We are currently being protected by our interplanetary neighbours from visits by hostile alien intelligences.

Mars Sector 8 is a wise and ancient intelligence from a higher frequency of vibration – millions of years more evolved than us, spiritually and in every other way. Such intelligences in this Solar System care deeply about mankind because of their deep compassion – and we should be very grateful that they do. If they did not, there is no doubt that

by now we would have been invaded and completely conquered, if not exterminated.

“Although this policing is going on, a greater freedom than ever before has also been decided upon. Some of these visitors are advanced enough to alter their vibratory rate to such an extent that they can live among us on Mars, Venus, Jupiter, etc. Some cannot yet do this. For those who are able, then the Planet Jupiter and Her moons is still the reception centre of entry, communication and education into this Solar System...”

Life on other planets in this Solar System does not exist on this plane of existence – for the most part, at least, if at all. The cultures of Mars, Venus, Jupiter, and so on, exist at higher frequencies of vibration – at which environmental conditions on those planets may be completely different from what they are at this frequency.

So, if NASA sends a spacecraft to Jupiter – it will not detect Jupiter’s highly advanced civilization, because it will be operating at a completely different frequency of vibration.

Less advanced races, like us on Earth,

could not survive at such a high “vibratory rate”. Interestingly, here we are told that there are other races, who, while more advanced than us, are still not advanced enough to handle the tremendously elevated vibration of Jupiter, for example. This gives us a little idea of just how far ahead of us beings on Jupiter really are.

“Not only you upon Terra are being observed by many different life-forms, but we also. We know this, and we go out of our way to educate, in a Spiritual way, these life-forms. You upon Terra, are for the most part, so backward that you will not expend any effort to educate different cultures. In fact, you need all the education from the right source which you are capable of absorbing. Even so, you as a Planetary race are still worth observing and you are now being observed by a million eyes, some of which do not belong in humanoid forms.

“It is to be hoped that these ‘younger ones’ will not take the general actions upon Terra as any sort of blueprint of behaviour. If there is much chance of this, then it is up to us to formulate some scheme whereby these ‘younger ones’ are correctly educated. Which, of course, we will do.

“...Divine Intervention—for want of a better term—is almost at an end as far as terrestrials are concerned, we will, however, watch very closely any cultures who may be belligerent towards you. Action will be taken against these, as indeed it has been in the past, as some of the fortunate ones among you fully realize.”

Again, we are reminded that we are being protected by peaceful alien intelligences from the potential machinations of hostile alien intelligences. The peaceful intelligences from within this Solar System, would do everything they could to avoid conflict and loss of life – but when absolutely necessary they are prepared to use force, and are brilliant warriors. They would only take such action if given permission by some of the most advanced beings in

the System. What’s more – such conflict would be strictly controlled to avoid any unnecessary suffering for the hostile intelligences. In fact, these benevolent beings would in certain instances even sacrifice themselves to help their enemies – while never truly giving in to evil in any form.

“And thus another change has been allowed to take place. A change for the better. An opening up of different types of experiences for those ready for them.

“You know, no Saint can ever be a Saint in Heaven unless He has been a Saint in hell!”

Here we see the lofty thoughts of an alien mind. The Master Aetherius is telling us here that it is relatively easy to be saintly if everyone around you is saintly, and your environment is spiritually uplifting. What is really difficult is being saintly when you are surrounded by people who would harm you or lead you astray, and where the environment is depressing and fraught with danger and temptation.

**It is this kind
of strength of
character that
prepares a person
for life at a
higher frequency
of vibration
as enjoyed by
beings on our
neighbouring
planets.**

Our alien visitors, from outside of this System, are not here to learn from us per se – but to observe how a backward race like us copes with major cosmic changes.

This is our opportunity to really change. If we do not – we will no longer be able to live on Earth. Then the Earth, as a

living Goddess, will take full advantage of her initiatory energies and finally cease to sacrifice herself for our sakes – as she has been doing for millions of years.

But if we do change for the better – our whole vibration will change such that we will be able to withstand the great power of these energies – and live in harmony with our supporting Logos – the Mother Earth. Not only withstand these energies – but benefit from them – and rise up the evolutionary ladder to join our more illustrious planetary neighbours. Then we too will be able to explore the Galaxy and beyond!
